Working restriction dates from local authorities

Whilst we endeavour to have your connection in place and ready to use within four to six weeks of the site being approved, over the festive period local authorities place restrictions on when we can carry out work, which can delay your completion date.

Please see below a list of restriction dates from the local authorities. If you have any problems with these dates or timescales, please speak to our customer care team. If it is imperative that your work is completed this year please speak to our customer care team so that we can assist you in getting site ready and make sure that we can help you to deliver your project on time.

Customer Care Team : 01772472141
