ICE DG EHV / HV Workshop Feedback Summary March 2019

Stay connected...

www.enwl.co.uk

- **Attendance**

- 9 stakeholders registered to attend this event, with only 5 attending on the day. This gives us an attendance rate of 55% - lower than the previous event held in June, which had a 65% attendance rate.
- Two delegates cancelled their attendance prior to the event due to other commitments. The one delegate that didn't attend on the day had forgotten about the event. Going forward we will be issuing calendar invites upon registration to assist our stakeholders.

- 100% of attendees rated the event as “useful” or “very useful”

- **Topics for next time**

- A further session on demonstrating compliance with EREC G99. How to submit evidence etc.
- More details on use of the Heat map tool.
- Help with the G99 procedures.
- G99 specifically for Type A

- We asked stakeholders out of the topics presented at the workshop they found to be the most useful / interesting. G99 came out on top with all but one of the stakeholders finding this session the most useful. The Heat map tool was also a popular topic.

“Overview of G99. It was important to get our head around the many forms and acronyms involved in the new process.”

“Finding out the demand locations and related tools uploaded on website.”

- 80% of attendees receive our quarterly newsletters and all rated them as “useful” or “very useful”.
- As part of our continued commitment to keep stakeholders up to date, we asked delegates if they would like to be contacted via text message for short updates and links to reports via our website. 80% of stakeholders thought this would be a useful form of communication.

Further comments.....

“Keep these sessions going, they are very useful.”

“Thank you for running the session.”

“G99 session. I thought it was pitched at a very good level (not easy to do!)”

“Great session, much details covered.”
